## Summary

Self-Taught Frontend Developer seeking opportunity to help companies in building Robust and exciting projects with great attention to details.

Below you'll find projects I've built that showcase my skills in developing software.

## Experience

**Personal Website | [View Live!](#)**

It is my Website. It contains my Portfolio and Resume. Build with React and sass, based on Functional components.

**Kanji Dictionary | [View Live!](#)**

Built with React, based on Class components, this App consumes an API to fetch and show the meaning of the user-searched Kanji Character.

**Diary App | [View Live!](#)**

It is a simple Diary App that performs all CRUD operations, stores data locally, and loads it on reload/revisit.

Based on functional components, relies on hooks.

**Pomodoro Clock | [View Live!](#)**

Started as a freeCodeCamp assignment to earn their certification, this App allows you to set the duration of your session and break and switch between the two when the timer runs out.

Based on Class components, relies on state and intervals.

**Tesla Clone | [View Live!](#)**

My first Personal Project, this is the Clone of the Tesla Website. I chose this as it was not very Intricate and easy to build.

## Education

**FreeCodeCamp** | Certification in Web design, Javascript, Frontend libraries

JUNE 2021 - PRESENT, ONLINE

## Skills

HTML, CSS, JAVASCRIPT, REACT, GIT, VSCODE
